How best to support me

- John talks in either single words or simple sentences. If you don't understand him, he will change what he says to help you understand him.
- John doesn't like people to rush him or push him, even joking, he will yell or scream.
- When John says he has corn dogs, he really is eating tofu dogs; no need to say anything about his diet.
- He is very social and likes to joke around but knows when it is time to "get to work."
 - If you have to cross streets or be somewhere with yellow lines, John prefers to hold hands with someone he likes. He doesn't like using his walking stick.
- He needs contrasting colors at his work station. If he is working with white envelopes, a brown or black desk (or paper on top) is needed for him to see the product
